

ROLATARP

Benefits

Increased profitability with lightweight, fast equipment for the ultimate payload and site turnaround

Maximised operator safety with simple, ground level hydraulic controls

No legal worries with current legislation conformity

Reliable "fit & forget" equipment with the peace of mind of the Edbro reputation for quality and high performance

Longer product life with design features to increase durability

Features

Covers all mandatory requirements for sheeting vehicle loads

Robust system designed from high tensile steel for increased durability in even the toughest of waste handling operations

Compliments the Edbro Rolatip hooklift equipment or can also be retro fitted to existing hooklift systems

Spring loaded roller assembly pulls the tarp up and over the load for reduced damage to the sheet and increased versatility with high loads

High tensile fabric sheet suitable for container sizes from 20-50 cubic yards

Proximity sensor per arm minimises risk of damage and downtime

A detailed specification sheet is available on request or to download at www.edbro.com.

The Edbro RTK Rolatarp sheeting system has been designed to compliment the Rolatip hooklift or optimise operation of other existing hooklift systems.
