

AIR CONDITIONING UNITS AVAILABLE

Tired of being hot in European model trucks?

Keep your cool with

Britcom International's solution!

We have in stock specialist roof mounted air conditioning units that work as effectively as original installed air conditioning.

Roof mounted: simply slot into the sunroof aperture

Electric: directly powered from the battery, so no maintenance as fully sealed unit

Operates between 17 and 28 Degrees C from 4 vented fans

Manual or remote control operation

Easy installation:

For vehicles with a sunroof there is no cutting required of the roof – once the sunroof has been removed on standard fitment models, the aperture fits into place

For vehicles without a sunroof an easy to install frame conversion kit is available – the roof will require cutting first

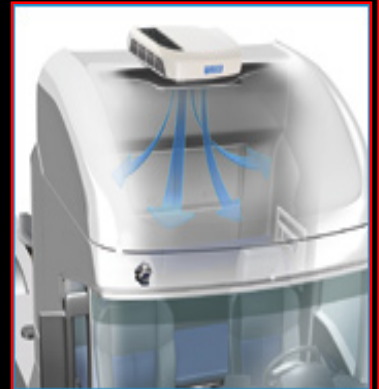

Units can still be operated whilst the engine is switched off: unlike factory fitted units that only operate with the engine running

Battery low level indicator with auto cut off to avoid running the battery down

Fits all European models:

ERF, MAN, Volvo, DAF, Renault, Scania, Mercedes, Foden, Iveco

All fitting and installation instructions supplied.
